

# Adaptive sheet

## ADAPTIVE

ACIDE HYALURONIQUE(AH) GEL  
(HYALURONIC ACID(HA) GEL)

What is an adaptive?

It is a concentrate of cosmetic ingredients, to be added to your daily skincare routine, in a few drops. This adaptive is an HA gel that helps the skin regain its volume and fullness.

### Characteristics

**Hyaluronic acid in the form of sodium hyaluronate gel**

### Did you know that?

The skin contains more than 50% of the hyaluronic acid (HA) in our body.

As a key component of the dermis, HA keeps the skin smooth and plump.

The level of HA gradually decreases over time, due to an imbalance of synthesis/degradation.

It is estimated that by the age of 50, people have lost half the amount of HA they had in their youth.

The skin dries out and loses its "baby skin" softness.

## Information

Ladaptive contains a high molecular weight hyaluronic acid (1 to 1.4 MDa). Hyaluronic acid is produced by a biotechnological process using lactic acid bacteria and a renewable plant substrate.

**PULP & MOISTURIZING**

## Origin:

Biotechnology

## INCI:

Water (and) Sodium Hyaluronate (and ) Potassium Sorbate

## Appearance:

Translucent fluid gel

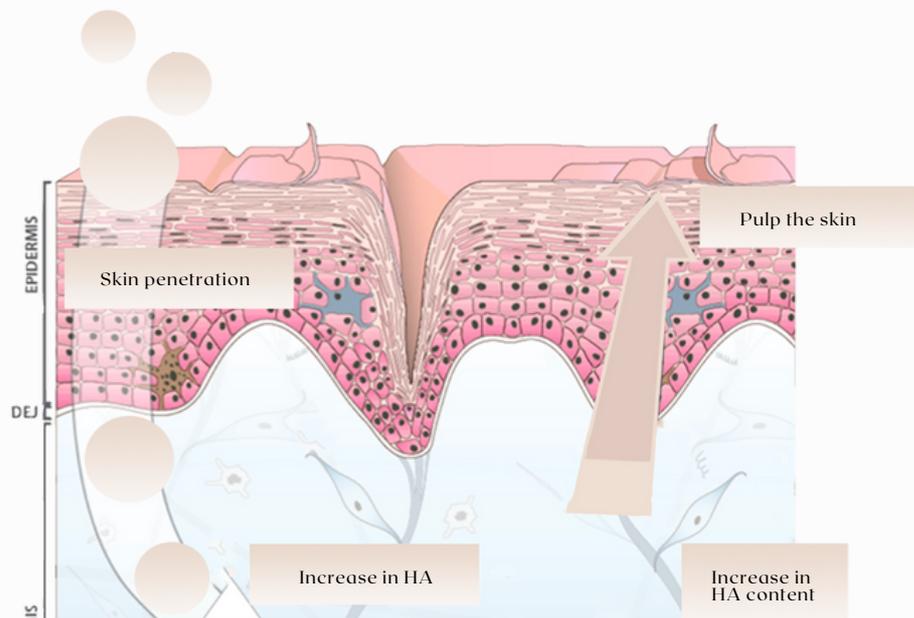

## Advice for use

Apply 3 or 4 drops in your cream and mix with your hand and then apply it directly on your skin.

## Frequency and area of application

1 to 2 times a week

Face

Environmentally friendly  
process, without organic  
solvents

### Dimensions

l label size  
H 70 mm x W 108 mm  
(To be confirmed  
according to the  
chosen packaging)

### DDM

18 months

YOUR BRAND

GEL d'ACIDE  
HYALURONIQUE
