ADIPODUCE

Informations

The Adaptives are mixtures of active concentrates obtained by green biotechnology, to boost your cosmetic care.

Adipoduce is an adaptive which, by inhibiting the activity of MMP9, limits the process of adipogenesis (differentiation of adipocytes and neo-vascularization). It thus prevents the formation of new fats.

Adipoduce, a product that combines a synergy of active ingredients to fight against "the return of fat cells"

Features

This slimming routine is composed of three products: 1 body product of your choice, the roller and the adaptive ADIPODUCE.

Take advantage of ADIPODUCE over a period of 30 days to **prevent the formation of new fat cells.**

Did you know that?

Adipoduce fights the return of adipocytes, and prevents the recruitment of new adipocytes via an anti-adipogenesis action, and therefore it inhibits the formation of new fat.
