

Nutra Sheet

NUTRA

COLLAGEN PEPTIDES

What is a nutra?

The nutra range is made up of food ingredients and is therefore intended to complement the diet.

Characteristics

Collagen is a protein that gives joints, muscles, tendons and skin their strength and elasticity.

Collagen peptides are fractions of collagen. They act as support structures. They give the skin its strength and elasticity.

NUTRA Collagen Peptides is available for sale with a choice of flavour.

LEMON OR **VANILLA**

ALL OUR FLAVOURS ARE NATURAL

Did you know?

Because of their small size, collagen peptides are absorbed by our intestines and travel throughout the body to act as building blocks for repair, reconstruction and energy.

Collagen peptides serve to stimulate beauty from within. They help target good preservation of aging skin and joints.

Indeed, the production of collagen in the body decreases from the age of 25. Moreover, today's diet often prefers lean meat without bones or cartilage, and therefore a lower consumption of external collagen. This leads globally to a loss of tissue tone (joints, muscles, skin...), joint pain and skin ageing.

Label Size

Label size
H 70 mm x W 108 mm (To be confirmed according to the chosen packaging)

DDM

18 months

Composition:

100% marine hydrolysed collagen (naturally derived from responsibly farmed fish).

Appearance :

Beige to brown powder

Collagen therefore has a major role in the prevention and management of joint disorders and the effects of cellular aging, but also in the prevention of weight gain and health in general!

YOUR BRAND

COLLAGEN
PEPTIDES

200g
